

## Abortion rates for Indiana counties in 2021.

An Indiana state judge recently issued a preliminary injunction against a state law, enacted after the U.S. Supreme Court removed federal abortion protections by overturning *Roe v. Wade*, that would ban nearly all abortions. In 2021, Indiana residents received 7,949 abortions. Marion County's rate of 11.2 abortions per 1,000 females of child-bearing age\* was 2.36 times higher than the next highest county and 5 times higher than the state's county average. Ohio and Vermillion counties tied for the lowest rate.

\*Female of child-bearing age: 10 to 54-years-old.
